## SPECIAL PRICING ON PEN3D2000

**P**EN3D2000 has recently undergone a face-lift. The feel is now similar to that of Windows XP. In addition a comprehensive help file has been developed. This is the new commercial version of PEN3D2000. This model now has in-built protection and an auto-update facility.

**T**he in-built protection encrypts the executable. Once the program is installed PEN3D2000 acts as a viewer and editor of PEN3D files. After the program has been unlocked then various licenses are available, see panel for a description of the licenses.

**A**utoupdate now inbuilt. PEN3D2000 now comes with an Autoupdater. This requires an internet connection. It ensures that you are always running with the latest copy of PEN3D2000 and help files. Any files requiring updating are automatically downloaded and installed.

**I**ntroductory pricing on this new system is available until 31 December 2005. The Registered Version of PEN3D2000 is \$4000 including GST (a 25% discount). Additional registered copies are \$1250 including GST. A 4 week lease is \$250 including GST. The Student Registered version is \$550 including GST and the Student 1 week lease is \$30 including GST.

**T**he offer of additional registered copies is available to all current registered users of PEN3D2000.

- Viewer license. Available for 15 days after installing
- Registered user license. This is a permanent license.
- Lease license for 4 weeks. Lease PEN for a period of four weeks. This enables the unrestricted use of PEN3D2000 for a period of four weeks without the need to invest in the outright purchase. This feature is suitable for occasional users of the software.
- Student Registered Version is available to bonafide students at tertiary institutions. All features are available except the object size is limited to 50 elements.
- Student lease for 7 days. This license is also limited to 50 elements.
- Autoupdater. All licenses now comes with an autoupdating program. This program connects to the Web and downloads the latest version of the software.
